

# Chemical Safety course - Energy

It has been agreed upon for staff and guests on ET:

“To work with chemicals at ET, you must have acquired sufficient knowledge to deal with chemicals safely and legally correctly. If this is not the case, participation in the internal chemical course is a requirement (BAS is the lecturer). In addition, you must be able to use Kemibrug to obtain chemical safety guidelines (“KBA”s) where, in addition to precautions and protective equipment, you will also find the waste group.”
